

Job Description: Consultant / Senior Consultant

We are seeking an experienced **Consultant / Senior Consultant** to join our team and deliver innovative supply chain and business transformation solutions. In this role, you will play a critical part in designing solutions to specific client problems and driving process improvement initiatives. Consultants / Senior Consultants work both independently and in collaboration with senior leaders to ensure client success — managing data analysis efforts, supporting solution development, and providing subject matter expertise across industries. Experience in Operations, Manufacturing, Logistics, and Industrial Engineering environments is preferred.

What You'll Do

- Support projects for supply chain clients as an individual contributor within the broader project team
- Serve as a key analytical resource in client projects, leading data cleansing and analysis, deriving insights from client data, helping to shape solutioning, and providing quantitative analysis to support recommendations and solutioning
- Support the project lead(s) in deliverable development and client communications
- Act as a fungible resource that can be deployed across multiple practice areas as part of a dedicated project team

What We're Looking For

- **Experience:** 0-5 years of professional business experience
- **Education:** Bachelor's degree in a relevant field (or equivalent experience)
- **Background & Skills:**
 - Strong analytical skills and previous experience working with large data sets (experience with SQL, Python, etc. is preferred)
 - Familiarity with Supply Chain & Logistics fundamentals
 - Demonstrated problem-solving capabilities

Professional Attributes

- Upholds professionalism and client-ready presentation on-site
- Proactively raises risks and challenges to project leadership, offering well-considered recommendations for resolution
- Demonstrates accountability, adaptability, and commitment to project delivery

Soft Skills

- Strong communication skills to clearly articulate analysis, explain models & frameworks, etc.
- Ability to work independently with some oversight from project leads and own individual project tasks end-to-end
